REF: Use of infected dental instruments as medium for transport of the HIV
– AIDS virus amongst patients of the Loma Linda Medical School

Dear Sir:

The purpose of this letter is to report the activities of certain medical professionals operating at the Loma Linda Medical School in Los Angeles that may be intentionally infecting dental patients with the HIV – AIDS virus.

As you know, during the litigation of my workers compensation case in Bakersfield, California, certain agents of the Adventist Health System – West (defense attorney Dennis J. Hershewe, esq.) attempted to have an order issued by workers compensation administration law judge Evelyn Dapremont compelling me to have a dental exam performed at an Adventist controlled facility within Loma Linda Medical School.

The dentist I was instructed to see had no real dental credentials in the specific issues associated with my jaw injury (which occurred in 1994 at an Adventist owned hospital in Bakersfield). Rather, the dentist that I was instructed to see specialized in the field of research related to virology and the transmission of the HIV – AIDS to patients via infected dental instruments.

At the time (2004) I demanded that I provide my own sterilized dental instruments to be used by the dentist. Said dentist refused to see me if I provided my own sterilized instruments.

I now have reason to believe that the Adventist Health System has a clandestine program that enables the silencing of troublesome individuals via the transmission of the HIV – AIDS virus to such people, via court ordered examinations and surgery. Further, I have learned that Loma Linda has ties to clandestine research projects sponsored by the Central Intelligence Agency, to include “Project Pandora”. The objective of “Project Pandora” was to have targets of 450 Mhz ultra high frequency radio waves commit suicide by radio wave induced depression (see research of Dr. Ross Adey).

It is becoming clear to me, that Loma Linda serves as a potential C.I.A. research facility for the perfection of the undetectable means of delivering a fatal illness to a targeted individual. Further, based upon reason and belief, it appears that the Adventist Health System may be perfecting the use of these techniques on members of the general population in East African countries (such as Kenya and Uganda) that use Adventist hospitals.

In my case, three (3) years have passed since I first alerted your offices concerning these issues. Meanwhile, all matters related to these issues have been reported to agents of the Federal Bureau of Investigation, who have instructed me that there is nothing they can do as this is a matter of national security.

Therefore, I am advising your office of the serious health risks that exist at the Loma Linda facilities related to dental surgery to merely make it a matter of record. Assuming you will take no action I will distribute this letter freely to members of the media and place on my public interest web site.

Respectfully,

Barbara Clark
